DWADASI SIVA TEJA

Software Engineer | Hyderabad,India

(+91) 800-889-8404 | www.linkedin.com/in/sivateja1034 | sivateja1034@gmail.com

Senior Software Engineer with 7 years of experience delivering scalable multi-tenant SaaS platforms and real-time communication systems. Recognized for anticipating technical challenges early, ensuring long-term system reliability, and driving measurable improvements in deployment speed, data performance, and application security.

SKILLS

Technical Skills:

- Programming Languages: **JavaScript, TypeScrip**t
- Web Development: **HTML, CSS, Angular, Node.js,React.js**
- Databases: **MySQL,Postgres, MongoDB**
- Frameworks: **Express.js,Loopback.js,Nest,js,Next.js**
- Version Control: **Git**
- Software Tools: **Nutrinos, Visual Studio Code,sublime Text**
- DevOps: **Docker, Jenkins,AWS,CI?CD pipelines,github actions**
- Problem Solving: **Algorithm design, debugging**
- Agile/Scrum Methodologies: **JIRA, Confluence**

Soft Skills:

- Effective communication,brainstorming, requirement analysis, problem-solving and critical thinking.

EXPERIENCE SUMMARY

Senior Software Engineer |Sreenidhi 1sports | May 2025 - Present

- Enhanced the payment workflow and implemented proper transaction tracking mechanism.

Full stack developer | Sreenidhi 1sports | Jun-2023- May 2025

- Designed and Implemented Various sports Enterprise Applications
- Automated multi-tenant creation with **express.js** with standalone database for each tenant
- implemented the user Analytics to Measure users access and repetitive module usage.
- Received performance based salary hike and promotion for my outstanding performance.

Software Engineer L1 | Inncrewin Technologies | Sep,2021 - May,2023

- Designed & implemented the chatmodule for the brand forwarding application
- Implemented the pay-per-view subscription based chat view for the influencer brand market
- Implemented VoIP extension for the teams.
- Received a performance based salary hike for successfully reaching the expectation.

software Developer | Prospecta Technologies | Oct 2018 - Sep-2021

- Creating Applications for the company R&D using **Angular**.
- Skilling up in Angular, node.js Fundamentals
- Received a performance-based salary hike of 33% in jan,2021 for exceptional performance.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Sreenidhi 1sports, Hyderabad | June 2023 - Present

- Migrated backend from **LoopBack.js** to **Express.js** with **Typescripts**, modularizing architecture and automating backend configurations, which cut new tenant setup time by 90%.
- Upgraded Angular from v9 to v17 and introduced reusable components, boosting maintainability and reducing UI development effort by 30%.
- Optimized state management with NgRx Data, streamlining API data flow, reducing boilerplate, and enhancing overall application responsiveness.
- **Developed scalable RESTful** APIs for user management, courses, registrations, and real-time video-sessions;
- Automated alerts, batch updates, and cleanups with cron-based jobs, improving operational efficiency.
- Enhanced the payment workflow by resolving settlement delays, extending clearance windows, and ensuring accurate transaction tracking, reducing false “payment due” cases.

- Implemented dynamic server-side search through **APIs** (instead of frontend filtering), improving query speed, scalability, and user experience.
- Integrated **Firebase Cloud Messaging (FCM)** for real-time notifications and introduced new features like **Razorpay payment links** and **bulk batch reassignments**, simplifying academic year transitions.
- Engineered a multi-tenant course management system with academy-level data isolation, migrated datasets to MongoDB and **ElasticSearch**, resulting in faster searches and higher scalability.
- Transformed a legacy standalone app into a modular extension of the main platform, enabling centralized control and seamless scalability across applications.
- Automated the Deployement of the web application using the **AWS , jenkins** and **github actions**

Software Engineer L1 | Inncrewin Technologies, Bengaluru | October 2021 – July 2023

- Developed a responsive house-search platform using **Angular 14**, with reactive forms and a carousel interface that improved the property browsing experience for tenants
.
- I**mplemented user-scope and role-based views** (tenants, owners, brokers) to deliver personalized dashboards with tailored access to property details and workflows.
- Automated tenant onboarding workflows, enabling users to submit documents, verify social security codes via third-party APIs, and complete leasing processes more efficiently.
- Designed and built secure RESTful APIs using Nest.js and PostgreSQL, powering property listing management, tenant data storage, and backend workflows.
- **Delivered a multimedia-enabled chat and payment platform with real-time messaging**, group chats, **pay-per-click content,** and in-chat payments, driving user engagement and monetization.
- **Implemented interactive user posting feature**s (likes, comments, engagement tracking) and optimized state handling with NgRx Data, improving scalability and reducing API overhead.
- **Developed a VoIP-based collaboration tool using SIP.js** and **Azure Teams** integrations, including tabs, bots, and responsive UI components built with Fluent UI.

Software Developer | Prospecta Technologies, Visakhapatnam |October 2018 – September 2021

- **PA (Ingredion, USA)**: Upgraded platform from Angular 9 11 with Material CDK, drag & drop, and virtual scrolling, boosting UI performance and reducing rendering time. Migrated controllers to Angular components, improving maintainability, and integrated **Azure MSAL authentication for secure access.**
- **Talent Referral (Ingredion, USA):** Built a hybrid mobile app **(Angular 8 + Cordova)** for employee referrals, with dashboards for HR to track engagement. Created reusable components and secured APIs with Azure API Management, improving workflow visibility and reducing code duplication by 25%.
- **Health App (Ingredion, USA)**: Delivered a COVID-19 self-assessment mobile app using **Angular 8** and Neutrinos, enabling employees to submit health status and admins to track compliance. Built responsive dashboards and ensured 24/7 availability via Azure DevOps pipelines during peak demand.
- **ClouID (ClouID, USA)**: Developed a secure web platform with Angular 11 + Node.js, optimized UI with Sass & Angular Material, and streamlined backend workflows with Express.js and Azure for enterprise deployments.
- **Nitrogen Fueling App (HPCL, India)**: Designed a billing app with Angular 8 + Node.js, enabling real-time vehicle billing and automated reports. Built dashboards with ngx-charts for analytics, improving operational efficiency at fueling stations.

EDUCATION

Bachelor of Technology,
Electronics and Communication,
Specialization in VLSI , K L University,
2013-2017

Publication

- Published paper on **Implantable blood pressure sensor Using COMSOL Multiphysics**, In Advances in Intelligent Systems And computing, Springer
